BLOQUER AB-20

GENERAL INFORMATION

The AB-20 is a simple yet versatile rope clamp to be used in many different setups. Its basic field of work is as a general purpose rope clamp to be used in various rope access and rescue manoeuvres.

Modern ascending techniques, however, give it value as a hand ascender and the webbing slot at the bottom of the device enables it to be stitched into the harness and used as a chest ascender.

The AB-20 is certified according to the European norms EN 567 for sport use and EN 12841 type B for work at a height use. According to the first norm it is tested to work with low stretch and dynamic ropes from 8 mm to 13 mm and according to second with type A low stretch ropes from 9 mm to 13 mm.

FEATURE	VALUE
DIMENSIONS	106 x 78 x 28
MASS	145 g
EN 567	8 mm - 13 mm (low stretch and dynamic)
EN 12841 TYPE B	9 mm - 13 mm (type A low stretch ropes)

STATIC TEST

Ø mm	DYNAMIC ROPE	LOW STRETCH ROPE	
8	5 kN	6,0 kN	
10	6,3 kN	6,5 kN	
11	6,6 kN	7,5 kN	
12		7,8 kN	
13		8 kN
